IN WASHINGTON SOCIETY

WONDERLAND

BIG FAREWELL ENGAGEMENT

Harry Moller, the young circus performer, will bid his friends farewell at the Wonderland this Thursday, Friday and Saturday, for his final appearance in Marion. Possessed of a remarkable amount of personal magnetism, and a thorough knowledge of human nature, the little fellow will put on a hig act unequaled by anyone, in his own original head and hand balancing act, in which he features his new novelty; singing up side down while doing a very difficult balancing act. Don't fall to see him in this sensational We will show as usual 3 fine reels of pictures and an illustrated song. The orchestra will play V. C. Minnelli's famous "White Cops !! Special matince for the ladies and children each afternoon. peice will remain the same, 5 cents to all,

CONTROL PHUNES MRS. O'GORMAN TO SHINE State Should Establish Strict Regulatory Laws.

YOUNT BILL IS REMEDY

Scoretary Mannington of the Tri-State Coal Association Says Business Men Demand Telephone Mergers if Property Supervised and Favors the Yount Measure.

Columbus, O. - (Special) - Among the many strong letters which have gone into the senate committee on railroads and telegraphs, urging the passage of the Yount telephone reg plation bill, one of the strongest ar guments was that advanced by Hon. Howard D. Mannington, former dep uty secretary of state, and now secre tary and commissioner of the Michigan, Ohio and Indiana Coal association, an assocition of coal operators and dealers in the three states above mentioned. Mr. Mannington's letter has been sent to every member of the general assembly. In it he mays:

"Nearly a year ago members of an association with which I was identified complained about certain telephone toll rates having been advanced in the state of Ohlo, and in my official capacity with that association I brought the matter to public that if the legislature, at the precening session, had passed the bill which contemplated the regulation of such corporations, there would have been an adequate remedy at law to meet this situation. What the attorney general meant at that time was that there was no public authority capable of passing upon the reasonable ness of the rates complained of and substituting other rates therefor.

The complainants against these rates had the right to appeal to the courts, but a court could only hold the rate to be unreasonable, being without jurisdiction to substitute a reasonable rate. The fixing of a rate is a legislative and not a judicial function, and therefore can not be exercised by a court.

"It therefore becomes necessary to enact further legislation along these lines if the public is to be accorded an opportunity to secure relief against what may be found to be unjust charges or inadequate service.

"In harmony with these ideas the congress of the United States at the session of one year ago enlarged the powers of the interstate commerce commission, giving to that body the same jurisdiction over the rates and services of telephone companies as it has exercised heretofore over common carriers by rati. This bill proposes to supplement, or rather complement, that authority by providing for regulation of telephone compa nies in Ohio.

"There has been much complain: in this state of late years because users of telephones, especially business and professional concerns, have been compelled to patronize two tele-Model Laundry. phone systems.

vice institution whose highest efficiency impites a monopoly. Two persons in a city, for instance, may use

MRS JAMES A.O'GORMAN

different gas, water, street railway or other public utilities, but to communicate with each other they must both one the same telephone service. "To authorize a monopoly of the telepaone business without at the attention. I was informed there was game time establishing a strong regno practical redress. At that time ulative and restrictive authority over the attorney general's office advised that monopoly might be disastrous, and certainly would not be advisable It is proposed here to permit telephone companies to be merged, but the railroad commission is to have authority over the merged telephone companies and their service. The powers to be conferred upon that commission are strong and ample to prevent the public from being im posed upon; Again, the telephone service of this state has not im proved within the past few years as the earlier progress promised. It has been practically at a standstill for a period of perhaps five years. When we undertake to ascertain the rea sons for this "marking of time" lt telephone service we are informed by those who operate these plants that they are not remunerative.

"If it is true that these corpora tions are non-compensatory, after be ing honestly capitalized and conduct ed in a businesslike fashlon, the public interest requires, and it is no more than the duty of the state to see, that they are enabled to secure a proper return upon their services the papile. The public does not at ways compain so much about the rates as it does the fast that summabout els nay get a lower or a different rate, and that the service may be poor or laade

quate. "I believe an amendment has been u ale which gives the commission au thority to control the issue of corporate securities of telephone companies. I have securities of telephone companies. I have advocated such public control for years of the regulation, then, which it is proposed to subject these corporations to seems to me adequate for all reasonable public purposes; at least the step is in the right direction. Under present conditions we have no say of resulating these concerns or securing adjustication of the question as to the efficiency of adequacy of their stryless or the reasonableness of their charges.
